

Custom AI for industry and the enterprise, *built around your problem.*

Arcscale Labs is an AI company based in the United Arab Emirates. We design, build and ship custom AI systems for manufacturers and growing businesses, built on their own machines, data and tools. We don't sell generic chatbots. We build AI that does real work, and we take it all the way to production.

— Building systems of the Future, Today.

01 What we build

INDUSTRIAL AI

Smarter machines, less downtime

AI that understands how a machine is running, catches problems early and guides operators, technicians and managers.

REVENUE AI

Intelligent CRM

Turns customer conversations into clear signals, so teams know who to focus on and what to do next.

AI PRODUCTS

Assistants that do the work

AI products and agents that research, write and work across tools, built for real users at scale.

02 How we work

STEP 01

Discover

We learn your operation and find where AI pays back fastest.

STEP 02

Prototype

A working demo on your own data, not a slide deck.

STEP 03

Pilot

A focused pilot with clear measures of success.

STEP 04

Scale

Production rollout, training and ongoing support.

03 Selected work

INDUSTRIAL AI · PACE

AI for packaging machines

We built an AI system that brings expert knowledge of the machine to everyone who works with it, from the shop floor to management, keeping production lines running, downtime low and decisions backed by data.

Pace's largest customers have responded strongly and asked to install it.

OPERATORS

Guided, step-by-step help on running the machine day to day.

TECHNICIANS

Spots issues early and guides the fix in minutes, not hours.

MANAGEMENT

AI analysis, reports and actionable insights on machine performance.

UAE CLIENT · SHIPPED

Machine intelligence platform

Delivered for a manufacturing client.

A similar industrial AI system, designed, built and shipped for a manufacturer in the UAE, which proves our approach carries across machines, sites and countries.

CLIENT · UNDER NDA

AI-powered CRM

Revenue intelligence for a growing sales team.

An AI CRM that turns a company's emails, calls and customer activity into clear signals, so the team knows which accounts to prioritise and what to do next. Details are confidential.

KLUI.AI · B2C

Klui

The AI assistant built for students.

Klui is our own consumer AI product, built to compete with the biggest names in AI assistants. Already in beta, with a full launch coming soon and strong early demand.
